TRUCK DIMENSIONS

☉ = Centre of gravity of unladen truck
Ast = $W_a + R + a$ (see lines 4.34.1 & 4.34.2)

$$R = \sqrt{(l_6 + x)^2 + \left(\frac{b_{12} - b_{13}}{2}\right)^2}$$

a = Minimum operating clearance
(VDI standard = 200 mm
BITA recommendation = 300 mm)
l₆ = Load length

NOTE:

Specifications are affected by the condition of the vehicle and how it is equipped, as well as the nature and condition of the operating area. Inform your dealer of the nature and condition of the intended operating area when purchasing your Hyster Truck.

- ☐ Max. battery
- † Bottom of forks
- Full suspension seat specified. Standard Hood specified. 953mm with raised hood."
- + Without load backrest
- add 32mm with load backrest
- h₆ subject to +/- 5 mm tolerance
- ◇ maximum flow set through dash display.
- △ HiP performance
- ▲ min/max
- ❖ Overall width 1116 mm with required 200/50-10 tyres fitted for masts 5000mm and over.
- ❖ Value shown for vertical battery removal; horizontal battery removal has 90 mm of clearance at center of wheelbase.
- ◆ Stacking aisle width (lines 4.34.1 & 4.34.2) is based on the VDI standard calculation as shown on illustration. The British Industrial Truck Association recommends the addition of 100 mm to the total clearance (dimension a) for extra operating margin at the rear of the truck.
- † Gradeability figures (lines 5.7 & 5.8) are provided for comparison of tractive performance, but are not intended to endorse the operation of the vehicle on the stated inclines. Follow instructions in the operating manual regarding operation on inclines.
- ⊕ LPAZ, measured according to the test cycles and based on the weighting values contained in EN12053

MAST TABLES KEY:

- ★ Add 721mm with load backrest extension
- ▲ Deduct 723mm with load backrest extension.
- * Add 723mm with load backrest extension.
- * Add 656mm with load backrest extension.
- ✦ Add 655mm with load backrest extension
- Deduct 655mm with load backrest extension.
- ◆ Tilt speed reduced to 1° per second by mechanical tilt speed restrictors for mast heights 5000mm and above.

RATED CAPACITIES

J2.0XNT
J1.8XNT
J1.6XNT
J1.5XNT

Load centre

Distance from front forks to centre of gravity of load.

Rated load

Based on vertical masts up to 3 430mm to top of forks.

NOTICE

Care must be exercised when handling elevated loads. When the carriage and/or load is elevated, truck stability is reduced. It is important that mast tilt in either direction be kept to a minimum when loads are elevated

Operators must be trained and must read, understand and follow the instructions contained in the Operating Manual.

All values are nominal values and they are subject to tolerances. For further information, please contact the manufacturer.

Hyster products might be subject to change without notice.

Lift trucks illustrated may feature optional equipment. Values may vary with alternative configurations.

CE Safety:

This truck conforms to the current EU requirements.

MAST AND CAPACITY INFORMATION

Values shown are for standard equipment. When using non-standard equipment these values may change. Please contact your Hyster dealer for information.

NOTE: The rated capacities shown are for masts in a vertical position on trucks equipped with standard or sideshift carriage and nominal length forks. Masts above the maximum fork heights shown in the mast table are classified as high lift and, depending on the tyre/tread configuration may require reduced capacity, restricted back tilt or wide tread.
